

## **LCD Pixel Error Criteria For ALL LCD**

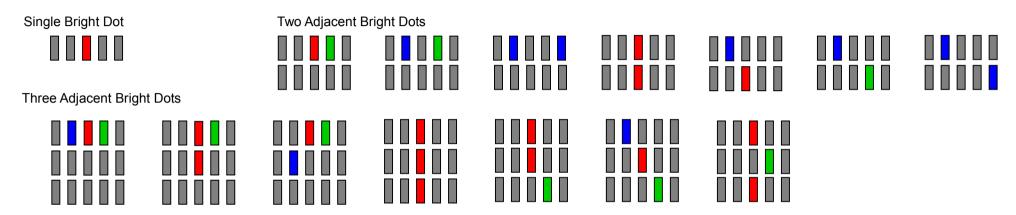

| No. | Inspection Item  | Specification  |   | Note                                   |
|-----|--|--|---|--|
| 1   | Bright Defect Dots   | Single Bright Dot $N \leq 8$ Three Adjacent Bright Dots $N \leq 1$ | Two Adjacent Bright Dots $N \leq 3 \text{ Pairs}$ $\text{Total Q'ty of Bright Dots}$ $N \leq 8$ | Definition of Bright Dots - Appendix I |
| 2   | Dark Defect Dots   | Single Dark Dot $N \leq 8$ Three Adjacent Dark Dots $N \leq 1$     | Two Adjacent Dark Dots $N \leq 3 \text{ Pairs}$ $\text{Total Q'ty of Dark Dots}$ $N \leq 8$     | Definition of Dark Dots - Appendix I   |
| 3   | Minimum Distance between Bright Defect Dots (Excluding two adjacent defect dots) | L≥5 mm   |   |  |
| 4   | Minimum Distance between Dark Defect  Dots  (Excluding two adjacent defect dots) | L≥5 mm   |   |  |
| 5   | Total Q'ty of Defect Dots (Including Bright & Dark Dots)                         | N ≤ 10   |   |  |

## Appendix I

## For ALL LCD

One Pixel are constituted by Three Dots (R G B)

1. Definition of Bright Dot - Bright Defect dots are seen in the Black Pattern, But not including Offdots

2. Definition of Dark Dot - Dark Defect dots are seen in the White Pattern
